

AUTOMOTIVE ETHERNET TECHNOLOGY TREND & NXP SOLUTIONS

DEC 2023

SECURE CONNECTIONS
FOR A SMARTER WORLD

NXP, THE NXP LOGO AND NXP SECURE CONNECTIONS FOR A SMARTER WORLD ARE TRADEMARKS OF NXP B.V.
ALL OTHER PRODUCT OR SERVICE NAMES ARE THE PROPERTY OF THEIR RESPECTIVE OWNERS. © 2023 NXP B.V.

AGENDA

- NXP Auto networking technology milestone.
- NEW E/E architectures and Networking challenges
- NXP Ethernet and Networking solutions

NXP AUTO NETWORKING TECHNOLOGY MILESTONE

IVN's Portfolio is continuously updated whilst keeping backward compatibility to previous generations

- Started since 1993 -NXP co-invented the CAN network
- A complete IVN portfolio resulting in a One Stop Shop for customers

NEW E/E ARCHITECTURES ARE EMERGING TO MANAGE INCREASING HARDWARE AND SOFTWARE COMPLEXITY

DOMAIN	BODY-ZONAL	X-DOMAIN ZONAL	CONSOLIDATED COMPUTE
			
<p>Creates logical separation to isolate processing of domain functions with static network policies</p>	<p>Creates physical separation for body domain functions enabling smart data and power distribution and reducing wiring/weight/complexity</p>	<p>Creates physical separation for cross-domain functions in zones for further wiring/weight/complexity reduction using distributed compute architecture</p>	<p>Centralized, service-oriented compute architecture with zones supporting SDV SW deployment and further wiring optimization</p>

NEW VEHICLE ARCHITECTURES DEFINE NEW REQUIREMENTS FOR THE ETHERNET NETWORK

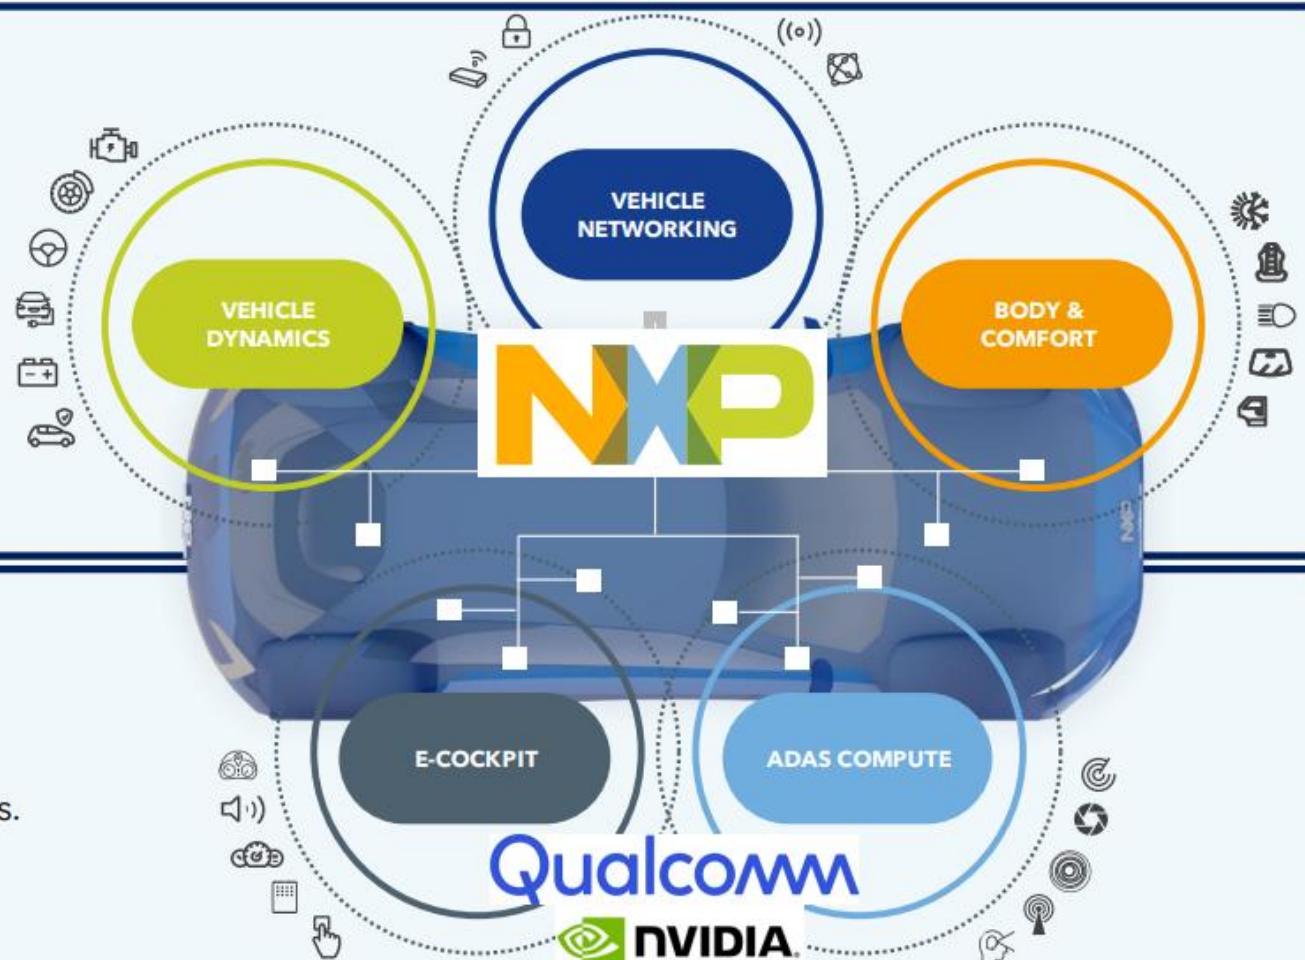

Several OEM challenges in the next decade

- Keep networks efficient and affordable
- Install scalable, robust Ethernet networks
From 10Mb to 10Gb
- Engineer complex, mixed criticality traffic
- Transition video (sensor, display) to Ethernet network
- Enable 10Mb bus, bring IP to the edge
On-ramp CAN / LIN to Ethernet
- Guarantee safety & security at architecture level

EVOLUTION OF VEHICLE INFRASTRUCTURE PLATFORM

Central Vehicle Compute Platform

Focused on safe control and driver comfort
Auto quality: Robust, safe, secure and reliable
Foundational across whole range of vehicles
5-7 Years Production Lifetime

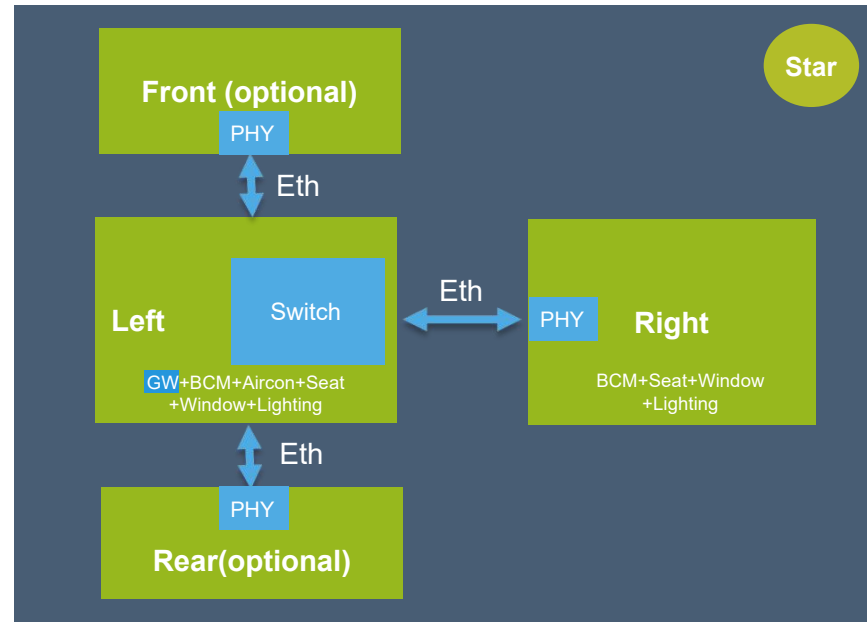

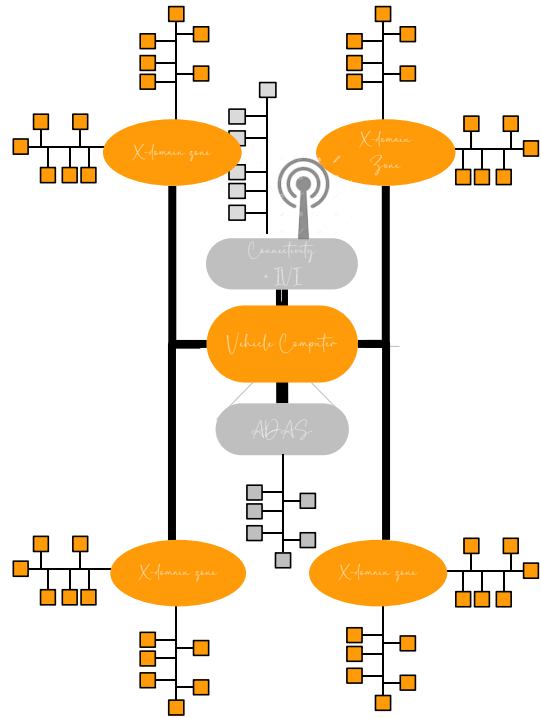

Optional and vehicle dependent

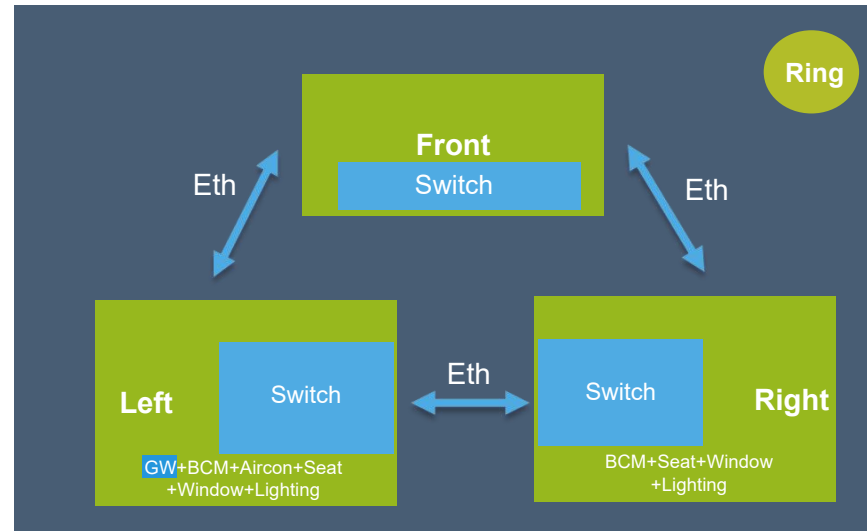

Optional features across a vehicle line
Fashion and time sensitive, replaceable every 2 years.
Re-used Mobile Technology.

ZONAL ARCHITECTURE OF TODAY IN CHINA MARKET:

2024+
X-DOMAIN ZONAL

- Star**
- 80% vehicle
 - Backbone: 100 Eth

- Ring**
- 20% vehicle
 - Backbone: 100/1000 Eth + TSN

SJA1110 SAFE AND SECURE AUTOMOTIVE ETHERNET SWITCH FOR TIME SENSITIVE NETWORKING (TSN)

Data and Connectivity

- 8 Gbps non-blocking switch core
- Scalable (xMII, up to 2.5 Gbps SGMII, 100BASE-T1 and 100BASE-TX)
- AVB and TSN support
- Fully open embedded Arm® Cortex® M7

Safety

- ASIL B Safety rating
- Dedicated safety features for increased service availability

Security

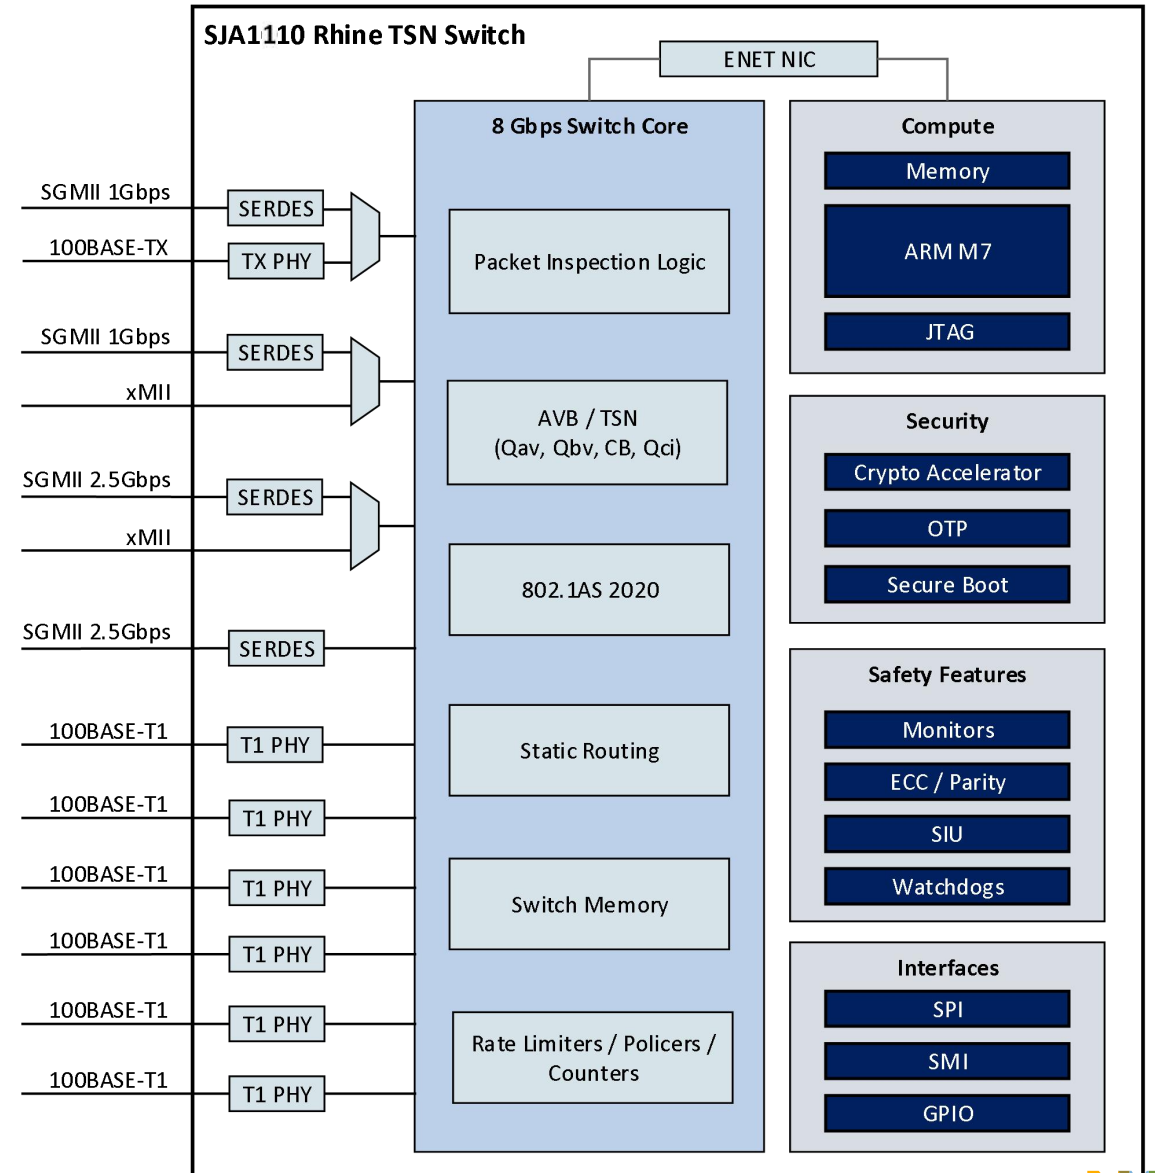

- Deep-Packet Inspection Engine
- HW-assisted secure boot (ECDSA & RSA supported)
- Feature rich traffic filtering/monitoring capability

Software

- Production intent SDK
- AUTOSAR Driver and MCAL
- Automotive AVB stack

True Automotive

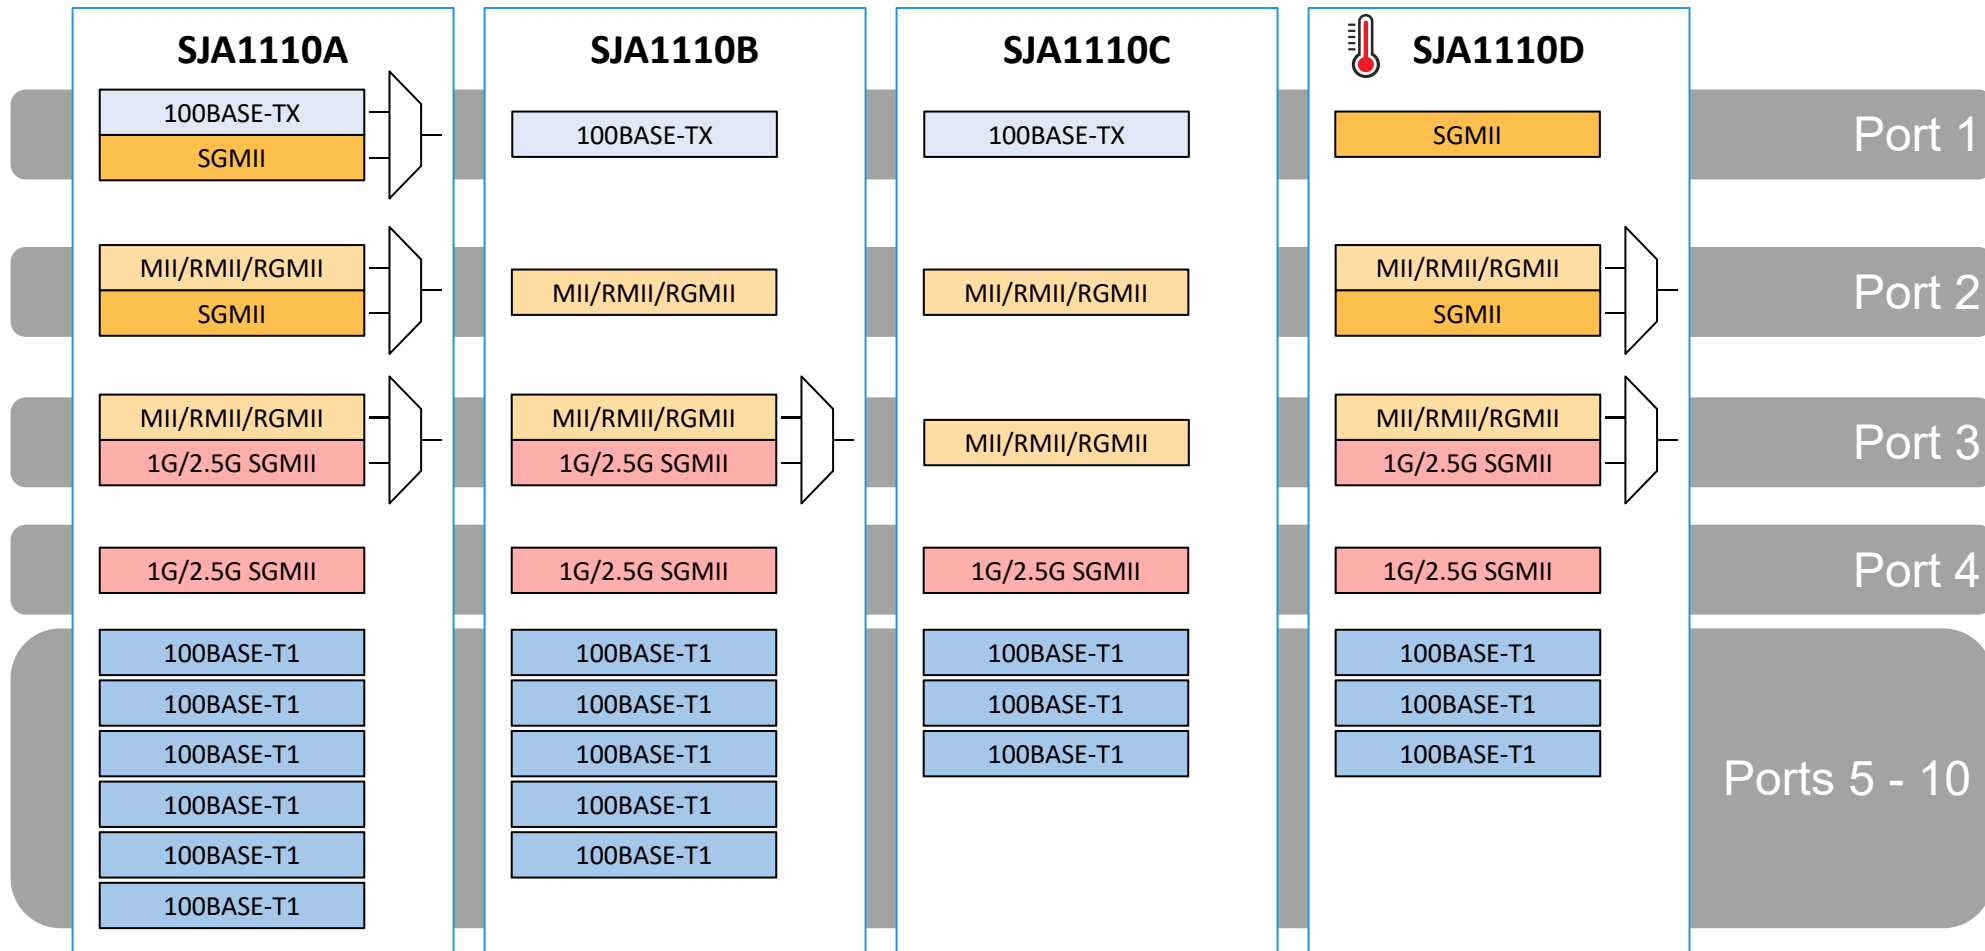

- High Quality, target 0.3 DPPM
- Temp. Range Ta = -40°C to +105°C / -40°C to +125°C
- Support for TC10 Wake-Up forwarding mechanism

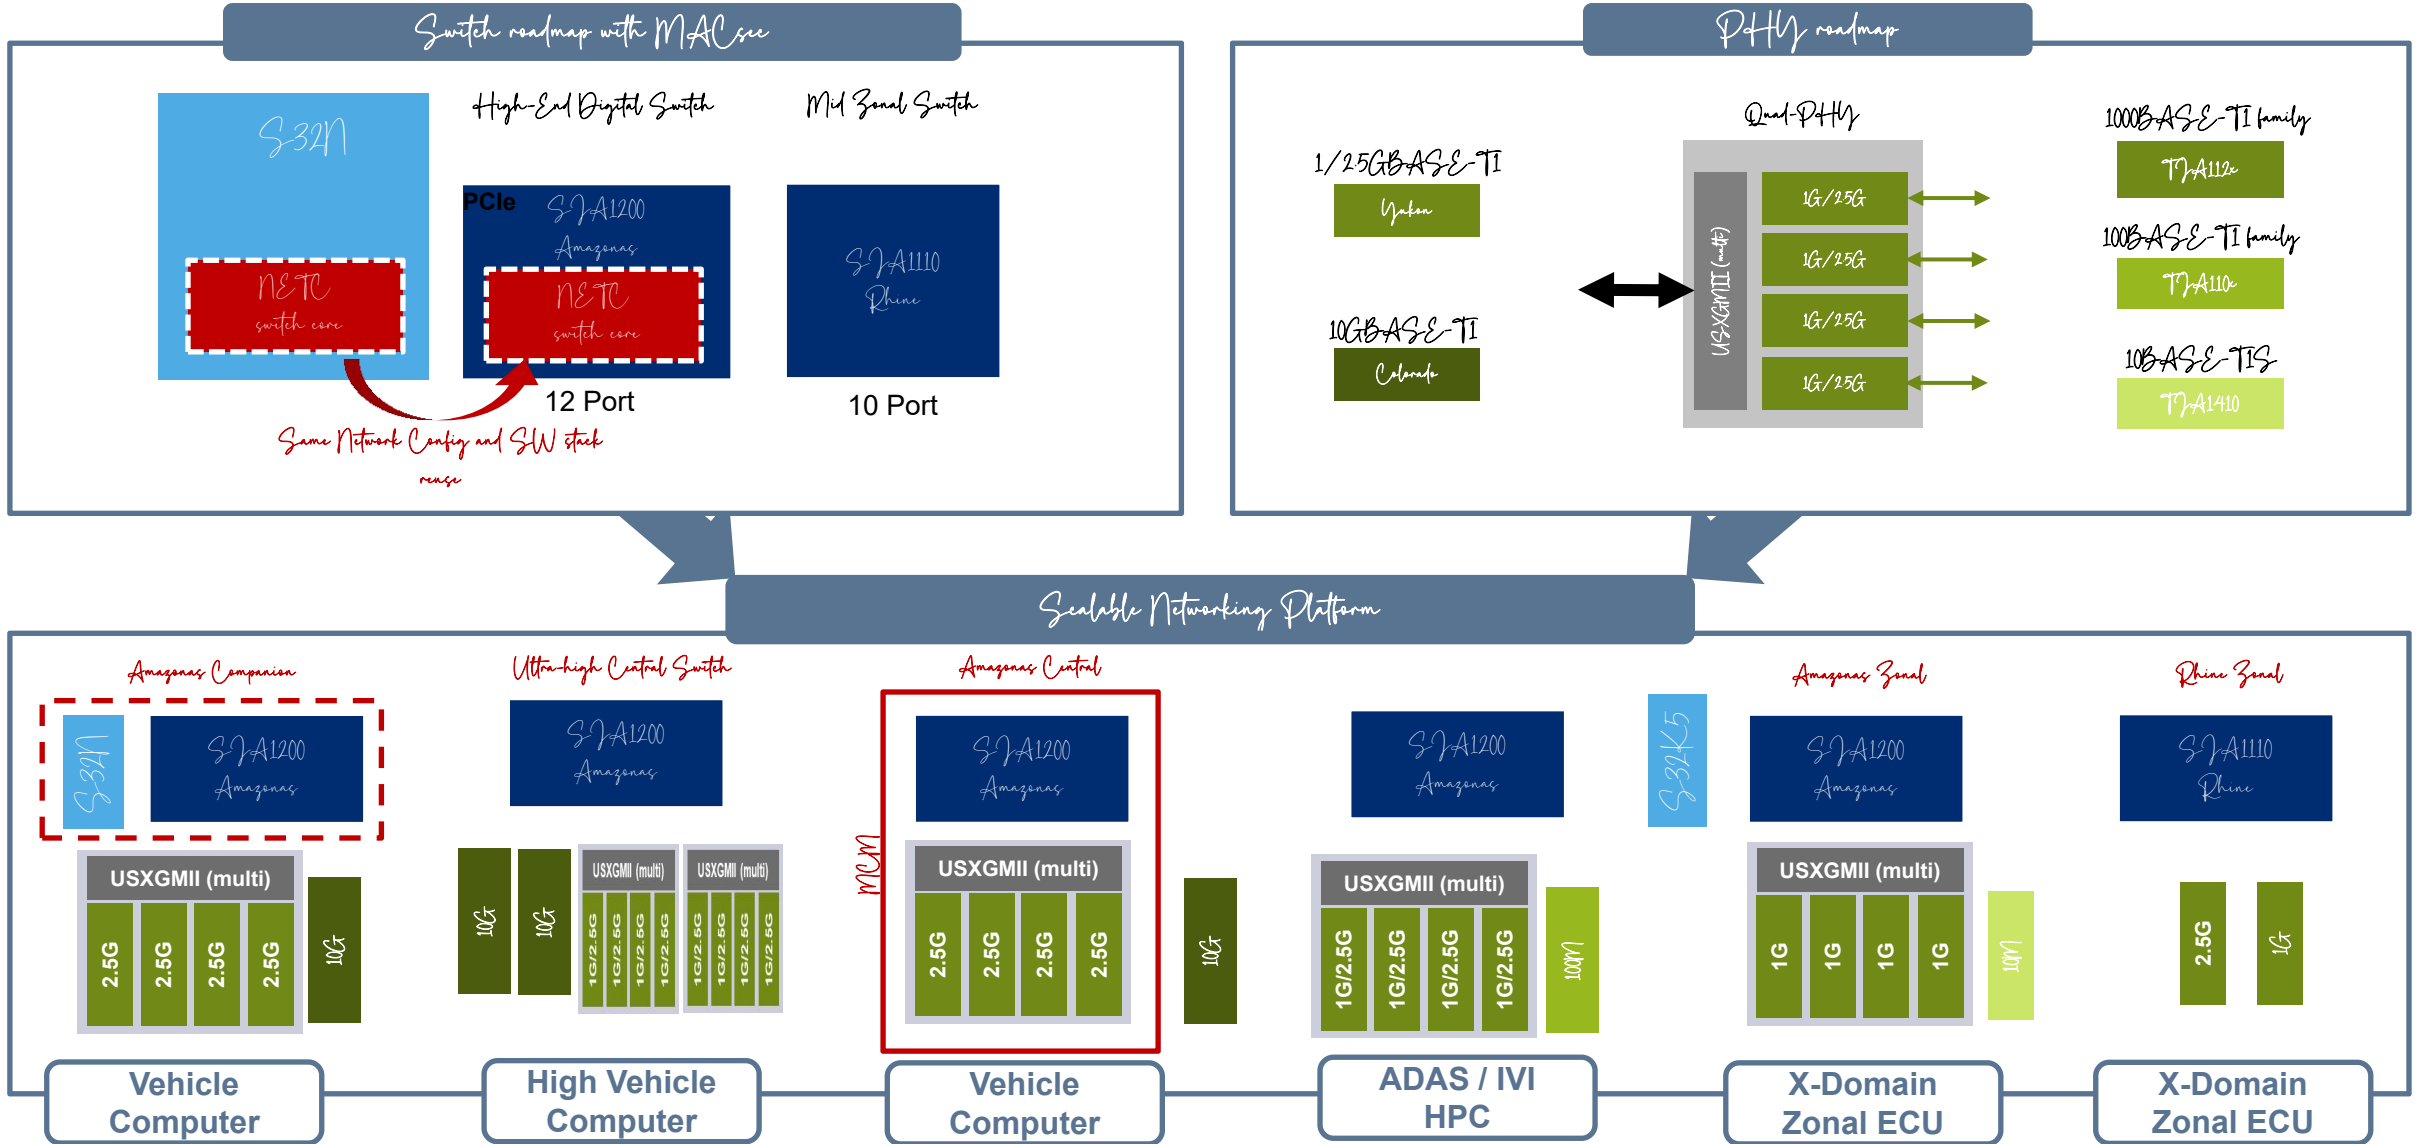

SJA1110 | ALL VARIANTS

Temp. Grade 1

ETHERNET SOLUTIONS: FULL NETWORKING PLATFORM

NXP NETWORKING SOLUTION | VALUE PROPOSITION

One Stop VEA Solution

Software Simplification

Scalability, Automotive DNA

Vehicle level

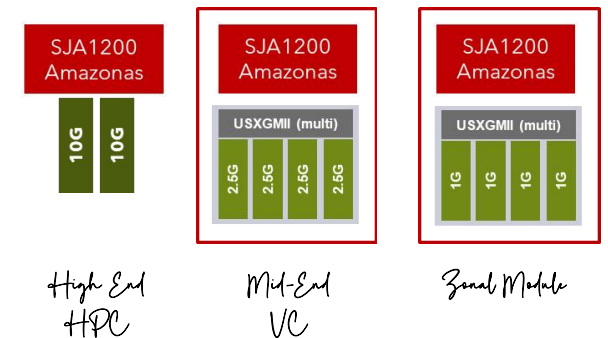

- Easy configuration of a multi-switch network
- Scalable from high end to low end architectures

Board level

- Expanding SoC/MCU networking sub system
- Same SW running on SoC/MCU and Switch

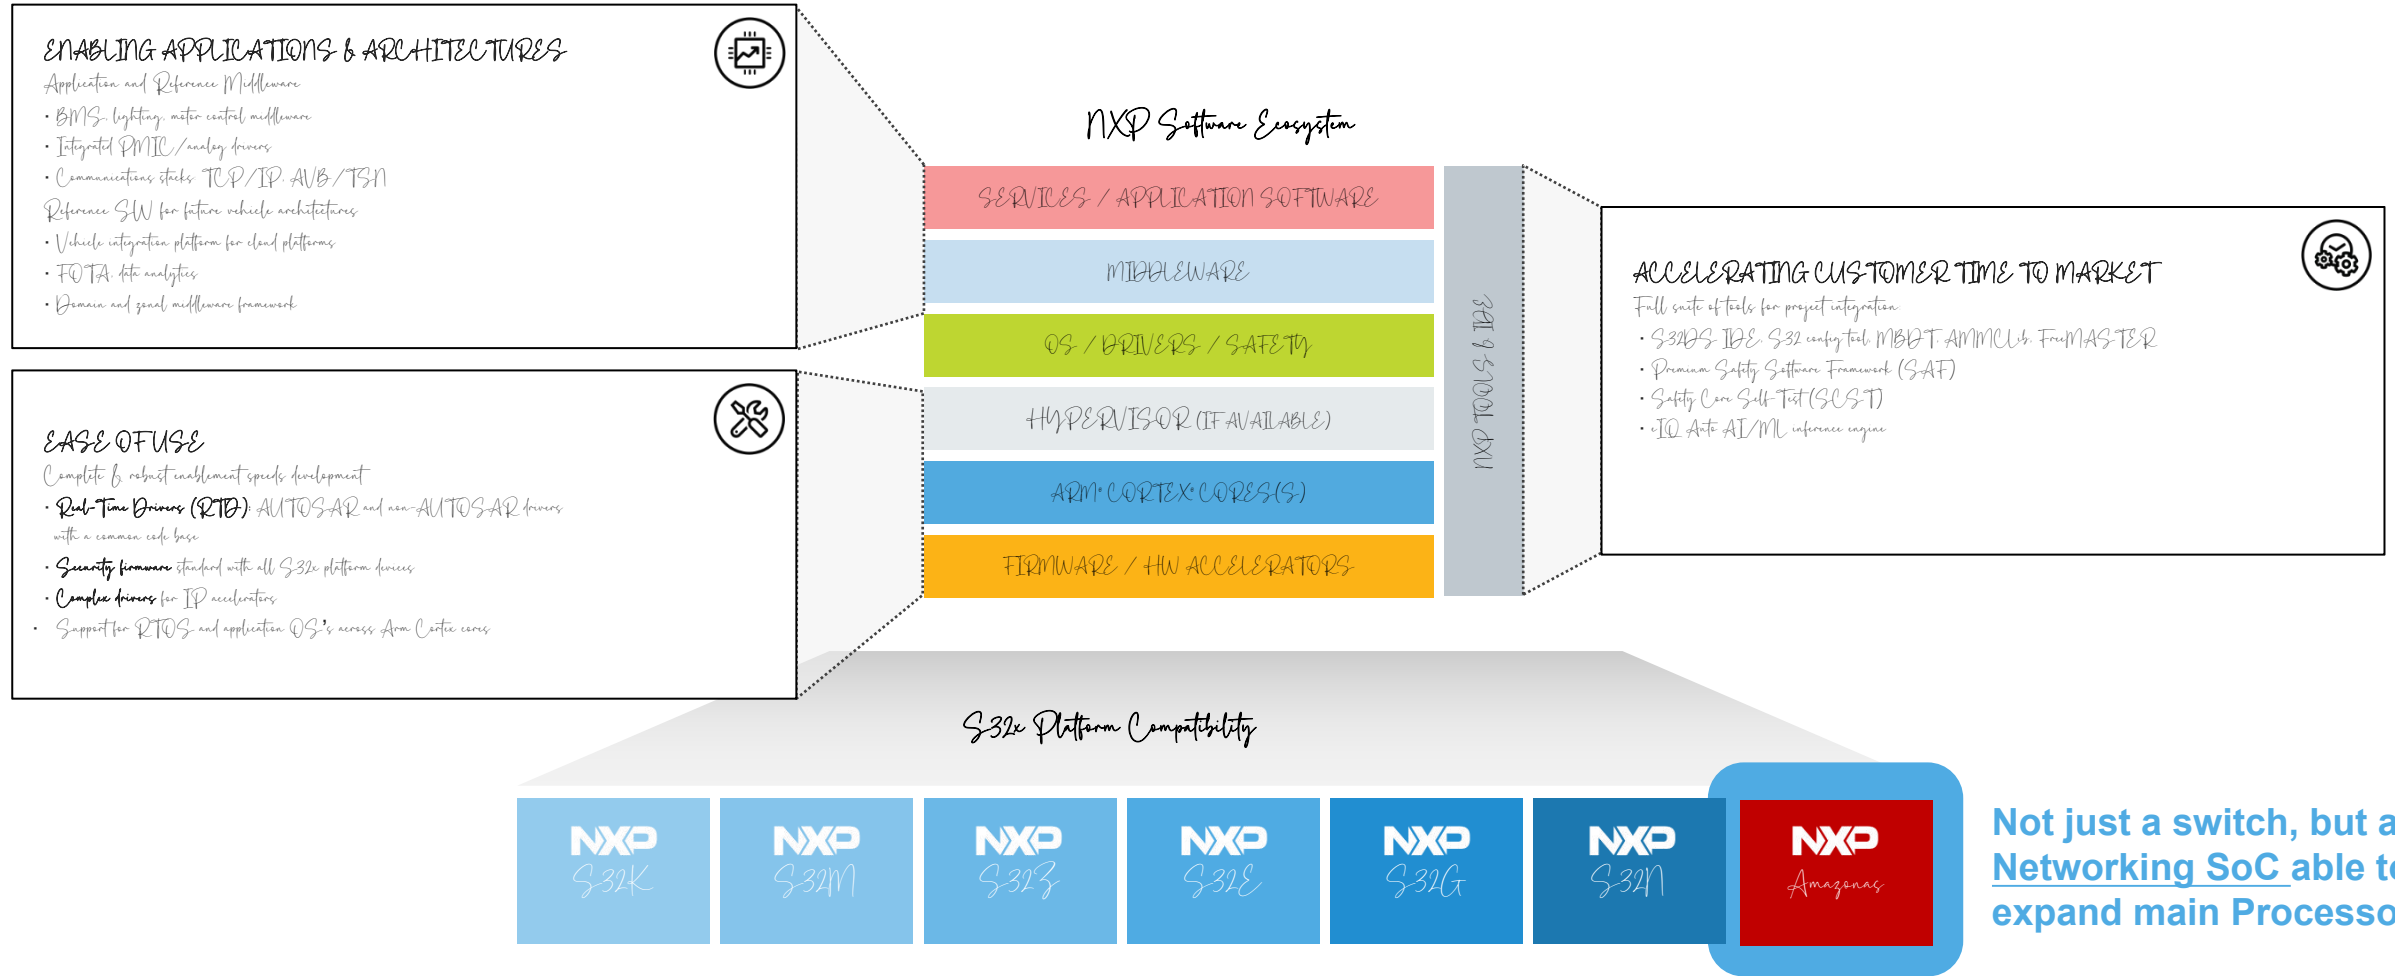

Product level

- High scalability & port configurability
10Mb → 10Gb
- True Automotive Quality
- Supply assurance, safety & security

ADOPTING THE COMMON S32X SOFTWARE PLATFORM

NXP provides leading class software tools, integrated frameworks and a broad ecosystem of solutions within a common software architecture platform. Platform compatibility across all S32x SoCs accelerates adoption of transformational automotive architectures.

NXP SOLUTION ADDITIONAL ADVANTAGES – IVN SIX PILLARS OF EXCELLENCE

Offering a broad IVN portfolio and driving innovation with strong key differentiators

The product we sell is more than a device!

Our total value proposition is based on our outstanding performance in six different dimensions:

Six Pillars of Excellence

Quality

Each PPM for an OEM means AVG 100 defects each day

Supply

Multi sourcing = flexibility

Support

Excellent networking and application support

Production

State-of-art in-house manufacturing and innovation

Portfolio

One Stop Shop experience

Innovation

Driving ideas for the future

..... and continuous improvements to exceed excellence in the future

Is targeting 1PPB in 2030!

SECURE CONNECTIONS
FOR A SMARTER WORLD
